

Project Name: Admin Panel for Bunking Bakery

Project Stakeholders: Bunking Bakery Owner

Project Developers: Mechatronics

Summary:

The new **website** with an **admin panel** developed by **Mechatronics** for **Bun King Bakery** is a comprehensive solution that significantly improves the online ordering experience for both the bakery and their customers. The admin panel allows the bakery to view current and future orders, delete future orders, and modify product details. These features make it easier for the bakery to manage their production and inventory, keep their menu up to date, and provide a better customer experience by streamlining the ordering process. By partnering with Mechatronics and adapting to changing technology, Bun King Bakery is taking a step towards staying competitive in the market.
